Jaskaran Singh

Assistant Director at NIC, MEITY
New Delhi, Delhi, India

Summary

Technology leader working at the intersection of government, data innovation, and emerging technologies, with a strong focus on Artificial Intelligence (AI), Machine Learning (ML), and data-driven decision-making. Currently serving as Assistant Director at the National Informatics Centre (Government of India), driving initiatives behind the Open Government Data (OGD) platform of India — a national resource enabling transparency, accountability, and innovation across ministries, states, and organizations. Experience spans the design and management of large-scale data ecosystems, with collaboration across government departments, startups, academia, and industry. This work has demonstrated how data engineering, analytics, and AI/ML can transform governance, enhance citizen services, and unlock value for the private sector. Key contributions include: Leading national-level data platform development, building scalable pipelines for high-quality datasets. Training and mentoring teams and state partners in modern technologies, coding best practices, and publishing standards. Partnering with researchers, civic-tech groups, and businesses to apply open datasets for AI/ML solutions, predictive analytics, and decision-support systems. Driving adoption of cloud-native architectures, APIs, search technologies (Elasticsearch, Drupal), and scalable data practices. Professional interests span AI/ML, NLP, geospatial analytics, IoT, microservices, and data security. A strong emphasis is placed on integrating machine learning workflows, big data platforms, and real-time analytics into public data systems to deliver scalable and impactful solutions. In addition to technical expertise, proven strength lies in program management, stakeholder engagement, and capacity building — bridging the gap between policy, engineering, and innovation. Impact is measured not only by the technology delivered, but also by adoption, usability, and long-term sustainability. Passionate about projects that combine AI/ML, data engineering, and societal impact, with the conviction that the future belongs to those who can translate data into actionable

intelligence. Open to conversations around AI/ML, open data, applied research, and cross-sector innovation.

Experience

National Informatics Centre, MeitY

Assistant Director

March 2022 - Present (4 years 4 months)

New Delhi

In this leadership role I head a multidisciplinary team responsible for designing, implementing and scaling the national Open Government Data platform.

Our mission is to unlock high-value datasets, ensure data integrity and inspire innovative applications that advance public services and economic development.

McKinsey & Company

1 year 3 months

Data Scientist

July 2021 - March 2022 (9 months)

Gurugram, Haryana, India

Data Scientist

January 2021 - July 2021 (7 months)

Gurugram, Haryana, India

CDGC - Training & Placement Cell, PEC

1 year 7 months

Joint Head (M.Tech)

August 2020 - July 2021 (1 year)

Chandigarh, India

Coordinated between students, faculty, and the Training & Placement Cell to streamline recruitment activities and industry engagement for the M.Tech cohort.

Served as a core committee member, contributing to policy discussions and execution of placement-related initiatives.

Assisted in organizing placement drives, internships, and corporate outreach programs, ensuring smooth communication between recruiters and students.

Supported peers in career development activities including resume preparation, interview readiness, and placement guidance.

Represented the student body in formal discussions, ensuring concerns and feedback were communicated effectively to the administration.

Training Class Representative (M.Tech)

January 2020 - August 2020 (8 months)

Chandigarh, India

Acted as the primary liaison between the M.Tech student cohort and the Training & Placement Cell.

Coordinated training schedules, placement activities, and feedback collection from students.

Facilitated communication regarding corporate training sessions, workshops, and placement processes.

Ensured timely dissemination of information and smooth participation of students in T&P events.

Built strong organizational and communication skills by balancing academic responsibilities with student representation duties.

Sabudh Foundation

Data Science Intern

July 2020 - December 2020 (6 months)

Sas Nagar, Punjab, India

TheSmartBridge

Internship Project

April 2020 - May 2020 (2 months)

Patiala, Punjab, India

This was a home internship during lockdown because of Covid-19 where I developed an Intelligent Customer Help Desk with Smart Document Understanding. This project was under smartinternz which is a platform owned by TheSmartBridge.

Infosys

System Engineer

January 2019 - May 2019 (5 months)

Mysore, Karnataka

Education

PEC University of Technology, Chandigarh

Master of Technology - MTech, Computer Science · (2019 - 2021)

Punjabi University

Bachelor of Technology - BTech, Computer Engineering · (2015 - 2019)
